Aging in Place

Designing Communities to Support Mobility

271 W. 3rd Street, Rm. 203, Wichita, KS 67202

2:00 - 3:00 PM CST

DESCRIPTION

One of the greatest challenges for maintaining the health and independence of our aging population is designing communities that provide accessible connections to support the changing mobility needs of our elders. Designing communities with the senior in mind can provide improved opportunities for healthy transportation while preserving independence and dignity for people who wish to age in place. What's more, communities that work for our eldest populations benefit users of all abilities.

PARKING & ACCESSIBILITY

Free accessible parking is available in the lot to the east of the building, with additional PAID spaces found in the metered lot to the north and in the EPIC Center parking garage to the south. Bicycles may be locked in the rack at the front of the building. The nearest BikeShareICT rack is 1 block east on the corner of Main and 3rd Street.

NEXT MONTH

December 18 - Education and Encouragement: Bringing the Right People Together - What really changes a person's behavior? How can agencies and activist help inform and encourage appropriate behavior on our streets and pathways? When new infrastructure or operations are introduced, how can we ensure that users understand intentions and exhibit safe operation? How do we best utilize the resources of agency staff and advocacy resources to help this process? This webinar will examine the effectiveness of Education and Encouragement, how to we broaden the tent of who's involved in the so called "soft" E's.

Continuing Education Certificates will be available after each webinar.
