WAMPO Demographics and Socioeconomic Report

There are an extensive number of demographic and socioeconomic variables available for the WAMPO region. To make the information more accessible and valuable to regional stakeholders, this report will provide a highlighted summary of the aggregated region and then showcase the data in infographics and tables. The following is an outline of the report structure:

• Tapestry Segmentation – The segmentation classifies households into fourteen categories predesignated to specific consumer preferences and lifestyles. The tapestries are built from consumer spending and socioeconomic data and help characterize the communities into distinct groups of behaviors. Specific descriptions of these grouping can be downloaded using the following link;

 $\frac{\text{https://doc.arcgis.com/en/esri-demographics/latest/regional-data/tapestry-segmentation.htm}{\text{SUID-423D9E4C-1C73-4039-82A9-29713A9D9DB9}}$

- Dominant Tapestry Map This overlays the various tapestry segmentations by Census Tract, demonstrating the diversity across the region.
- Diversity Index Map This segments the Census Tracts and assigns each a diversity index for the population within the area.
- Demographic and income comparison profile The profiles contain demographics of each region, breaking out sections of the population by income, age, sex, and race.
- Age by sex by race profile The report combines the variables of age, sex, and race to provide a more specific cross-section of the region's constituents.

12B	Traditional Living 18,444 households	8.6% of Households	~
6A	Green Acres 16,243 households	7.6% of Households	~

Dominant Tapestry Map

The Tapestry Segmentation is a tool developed by ESRI, a leading Geographic Information System (GIS) software company, to classify and analyze US residential areas based on demographic and lifestyle characteristics.

The segmentation groups similar neighborhoods together based on over 100 demographic variables such as age, income, education, and employment, as well as lifestyle attributes such as leisure activities, shopping habits, and media preferences. By using Tapestry Segmentation, organizations can gain insights into local populations' needs, preferences, and behaviors.

The dominant tapestries within the WAMPO region were Family Landscapes and Cozy Country Living. Family Landscapes households are successful young families in their first homes, own SUVs, eat out frequently, and are engaged in activities like bowling, golf, and video games. In contrast, Cozy Country Living households are empty nesters living in single-family dwellings, own lots of tools for their lawns and gardens, and listen to country music. The closer to the city center, the larger the lifestyle diversity. Even more proximal suburbs, such as Maize and Derby, exhibit different tapestry segments.

Diversity Index Map

Regional racial and ethnic diversity is essential to consider in transportation planning. Diverse communities attract a wider range of businesses, increase innovation, and improve health outcomes. The following diversity index is based on a scale of 100, with 100 being the most diverse. The map displays the diversity by Census Tract and shows that suburban areas are less diverse than the city center. However, the enclave of Eastborough demonstrates a low diversity index compared to its surrounding areas.
