PROJECTS IN THE FFY2023-FFY2026 TIP

The WAMPO FFY2023-FFY2026 Transportation Improvement Program (TIP) includes 143 projects, with a combined cost of over \$1.6 billion. This includes:

- Projects that are programmed to use WAMPO-suballocated federal funding (37) and projects that only use other federal, state, or local funding sources (106).
- Projects carried over from the FFY2021-FFY2024 TIP (89, some with modifications) and projects that are new for the FFY2023-FFY2026 TIP (54).
- Projects programmed to be carried out during FFY2023-FFY2026 and projects from prior years that have been kept in the TIP because they are not yet complete (including projects some of whose phases are in FFY2022 or earlier and other of whose phases are in FFY2023 or later).

The following pages provide detailed information on each project in the FFY2023-FFY2026 TIP, including its name, location, scope, and lead agency, as well as a table showing how much money is programmed to be spent on the project, broken out by Federal Fiscal Year, project phase, and funding source. Also included is contact information for the individual(s) placed in charge of each project by the lead agency.

It is common for TIP project details to be amended several times before the next adoption of a new TIP. For the most up-to-date, detailed TIP project list for the WAMPO region, visit <https://www.wampo.org/transportation-improvement-program>.

Table A1: Project List

The Transportation Improvement Program (TIP) lists all federally funded transportation projects within the Wichita Area Metropolitan Planning Organization planning area, as well as other transportation projects deemed regionally significant. The TIP provides a prioritized, four-year list of projects planned for the WAMPO area.

Project Title Wichita Intelligent Transportation System - E 21st St N

Project Limits 21st St N, Cleveland St. to 159th St. E

Project Scope Traffic signal optimization of 9.25 miles of 21st St N from Cleveland Ave to 159th St E. Project includes 24 signalized intersections and crosswalks, and the installation of conduit and fiber, which will connect to existing KDOT fiber along I-135 and K-96. Traffic signals will be connected to the City's central traffic management system. KDOT's project to expand K-96 to 6 lanes (096-087 KA-6099-02) will result in a diversion of traffic onto the adjacent 21st St arterial, which runs parallel to the K-96 project. The signal optimization will increase the operational efficiency and capacity of 21st St N to meet existing needs and to accommodate the increased demand resulting from the K-96 project.

Project Title Douglas, Seneca to Meridian

Project Limits Douglas, Seneca to Meridian

Project Scope To identify which modes of transportation and amenities (vehicles, transit, bikes, and on-street parking) should have an identified location on this section of Douglas and where they should be located. The existing roadway is marked as a two-lane roadway but is 50' wide from back of curb to back of curb. If on-street parking is identified as being needed in this corridor then curb bulbouts will be built with the project. Multiple different scenarios (three-lane, two -lane, on-street parking, on-street bike lanes, etc.) will be evaluated with the community as part of this project.

Project Limits The project will extend the path west of McLean within the old Pearl Street right of way (north of Douglas) to Exposition. The path will continue on-street southwest thru the neighborhood to K-42 and McCormick. The project also includes on-street markings on Taft between Sycamore and McLean.

Project Scope The project connects the Delano business district to the Arkansas path, provides access to two universities and is an extension of the Sycamore bicycle route. The project would include installation of paved paths and crossing improvements at new and existing signals. Delano Path: the former railroad corridor north of Douglas Avenue from the Arkansas River path to the proposed future park site west of Exposition. The route will then be on street through the neighborhood with sharrow markings south on Elizabeth to University, west on University to Hiram (adjacent to Friends University), south on Hiram to Kellogg Dr, then west through the Kellogg/Meridian/Edwards interchange, south of K-42 and McCormick.

Project Limits 17th Street, I-135 to Broadway

Project Scope The project will re-construct the existing 2-lane asphalt mat street to provide a 3-lane curb and gutter section to facilitate truck traffic. Drainage improvements will be made. In addition, bicycle improvements will be made to connect the Midtown Multi-use path (near 15th & Broadway) to the McAdams Multi-use path (at McAdams Park). Sidewalk improvements will also be made.

Project Title Pawnee, Webb to Greenwich

Project Limits Pawnee from Webb to Greenwich

Project Scope Re-construct the existing 2-lane asphalt mat street with a 3/5 lane street with curb and gutter on Pawnee from Webb to Greenwich. Final lane configuration will be determined as initial concepts are developed and traffic data has been updated from the recent construction/opening of the Southeast High School located at Pawnee & 127th Street. The intersections of Webb and Greenwich will have been improved with left turn lanes on all approaches. However, ADA improvements may be needed at the intersection of Webb Road to be sure wheelchair ramps and pedestrian signals are compliant. The project will include drainage improvements and a minimum of a 6' sidewalk on each side of Pawnee. The Bicycle Master Plan will be reviewed to determine what bicycle facility is most appropriate to connect existing paths along Greenwich and Pawnee.

Project Title Sedgwick County Transportation Comprehensive Operations and Technology Feasibility Study and Implementation

Project Limits Sedgwick County

Project Scope Conduct a comprehensive operations and technology feasibility study and implement recommendations. The proposed study will be comprehensive; including recommendations on improvements to the current service delivery model and operational structure to improve access, quality of service and productivity. As the system grows, the agency needs to determine whether the current mix of in-house and contracted service is the most efficient way to provide service. This project and its funding will be transferred to the Federal Transit Administration.
